4. Weather Control: -1 PR Cost. Limited weather options - cold-based and cold-adjacent weather only (see weakness below).

Weakness - Low Self-Control: He cannot create or control Thunderstorms, Tornado, or Hurricane winds. The potential for controlling those weather forms is possible but currently unknown to Ice Storm.

ORIGIN AND BACKGROUND: (Canadian) Brandon Spencer was born in the city of Thunder Bay, Ontario. He is a mutant with cold-based powers. His powers didn't manifest themselves until his early twenties. That's when his cold powers emerged. His weather control powers are a more recent addition and he doesn't have complete control over them as of yet (hence his weakness).

Ice Storm is a founding member of Mutation Inc. He is the professional and romantic partner to Head Trip. While Head Trip may be the team leader of Mutational Inc., Ice Storm is the power behind the 'throne'.

In his civilian identity, Brandon is a registered nurse. He used to work in an old person's home before his powers appeared. While he may be a criminal (who wants to get rich), he has a line he won't cross - no killing and he won't harm children or animals.
